### HIGHLIGHTS

#### Improving Health Access and Scaling up Responsiveness:

769 normal deliveries were attended by skilled birth attendants.

100,886 new malaria cases were reported among children under 5 years old.

#### Prevent, detect and respond to epidemic prone disease outbreaks:

Around 73% epidemic prone disease alerts were verified and responded to within 48 hours.

A total of 2,618 children (6 months to 15 years) vaccinated against measles.

#### Quality Essential Clinical Health Services

121 Severe Acute Malnutrition (SAM) cases were treated in stabilization centres.

Five health facilities are providing sexual and gender based violence (SGBV) services and 6 SGBV survivors received clinical management of rape (CMR) services.

#### Improving Resilience- Mental Health Response:

789 beneficiaries received Mental Health and Psychosocial Support (MPHSS) in conflict affected areas.

12 health facilities are providing MPHSS.

## Public Health Risks and Key Gaps

- The completeness for IDSR reporting at the county level was 57% at the end of June 2019. The completeness for EWARS reporting from IDPs was 90%.
- Malaria was the leading cause of morbidity and mortality accounting for 61.0 % of all morbidities and 60, 4% of all mortalities in week 26 of 2019.
- An Ebola Outbreak was confirmed in Uganda on the 9 June 2019.
- EVD alerts were investigated in Juba and Yambio, and Ezo, Nimule and Yei in the month of June 2019

## Measles Outbreaks

### Renk County

A new measles outbreak has been confirmed in Renk County. A reactive vaccination campaign targeting 16,680 children aged 6-59 months was conducted by World Vision with coverage of 89.15%.

### Wau County and PoC AA

In week 19, 2019 a measles outbreak was confirmed in Wau County and PoC AA in Wau. Following the confirmation, IOM in collaboration with WHO, UNICEF and other partners conducted a reactive campaign reaching a total of 27,166 children 6-59 months with coverage of 85%.

### Aweil East County

Following the measles outbreak confirmed in Aweil East County on 13 May 2019, a reactive vaccination campaign was conducted by IRC and the Ministry of Health reaching 52.3% of the target.

### Tonj North

Since the confirmation of measles outbreak in Tonj North, reactive vaccination campaign was conducted by UNKEA with coverage of 91%.

## Progress on Health Cluster Work Plan

- Health Cluster has undertaken the process of prioritization of counties based on public health priorities for the second allocation of SSHF.
- Health Cluster team analysed the public health profile of the 26 selected counties which feeds into the allocation of funds and clinical packages.
- SAG meeting was conducted during which discussions and deliberations took place on humanitarian development nexus.
- Health Cluster Coordinated with IRC and TADO to conduct Measles vaccination Campaign in Aweil East.
- Assessments were conducted to assess the public health situation in Nasir, Kajo keji, Leer, Koch, Myandit by the HC partners, the assessment reports were reviewed and feedback provided by the Health Cluster Team to improve the quality of assessments and to guide on the response measures.
- Health Cluster Coordinated with IOM to conduct measles vaccination campaign in Wau.
- Health Cluster team took over the responsibility of conducting the emergency responders meeting from IOM owing to an increased incidence of measles cases in different counties.
- A report was prepared incorporating the public health consequences due the strikes of the staff and closure of the health facilities. The report was presented to the Humanitarian Coordinator.
- SSHF SA2 online project reports on GMS was reviewed and feedback provided by the Health Cluster team.

## Partner Implementation Key Highlights

- **International Medical Corps (IMC)** - conducted 13,723 outpatient department (OPD) consultations; 924 pregnant women attended antenatal care (ANC) services; 317 mother receive postnatal care (PNC) services; 319 deliveries conducted by skilled birth attendants; 16 malnourished children with medical complication treated in stabilization centers; 398 severe acute malnutrition (SAM), 1,130 moderate acute malnutrition (MAM) and 551 pregnant and lactating women (PLW) enrolled in the outpatient therapeutic feeding programme; 110 health workers trained on Ebola basic IPC, surveillance and laboratory.
- **MAGNA** - conducted a total of 774 OPD consultations; 34 pregnant women attended antenatal care; 275 children under five and 83 pregnant and lactating mothers screened for malnutrition; 857 people reached with health education messages on hygiene and use of aqua tabs for safe and clean water in Duk Pagaak, Jonglei.
- **CRADA** - conducted 3,772 OPD consultations in Pibor; 39 deliveries conducted by skilled attendants; reached 472 children with vaccination; screened 177 children with Mid-Upper Arm Circumference (MUAC); reached 3,772 people with health education; 223 women attended ANC.
